Address Tamil Nadu, Karur DT - 639113

Developer with 2 years of experience and creates the digital software that entices the user into a seamless interaction between humans & computers. Expertise on focusing the Development and user experience and proficient in **Angular**, **Reactjs**, **ColdFusion**, **HTML5, CSS3, JavaScript , SQL, Figma** and creating self- contained, reusable, and testable modules and components.

Technical Skills

Framework/Library : Angular8+, React (Beginner) , Bootstrap

Programming Language : ColdFusion, JavaScript

Web Technologies : HTML, CSS, SASS

Database : SQL server

Worked IDE : Visual studio Code

Source Control Tools : Bitbucket, GitHub , Source tree

Project-management tools: Asana, Jira

UI/UX : Figma

Education

B.E Computer Science
2018 - 2022
M. Kumarasamy College of Engineering, Karur - 7.4 CGPA

Key Skills

- Debugging
- Git
- Time management
- Performance Improvement

Experience

- **Software Engineer**   01/2024 - Current
  Chetu Inc, Noida, India

- **Trainee Programmer - 1 Year**   09/2022 - 09/2023
  Ionixx Technologies Private Limited, Chennai, India

- **Project Trainee - 1 Year**   08/2021-08/2022
  Ionixx Technologies Private Limited, Chennai, India

Projects

Project 1: Coredera / Product
Duration: Around 5 months
- Coredera project is based on SMA rules, live stream conversion of Profit and loss of the user and margin requirements and post trade of the trade orders that take place in the market.
- It was built using ColdFusion, angular & java in hybrid microservices-based architecture.

Technologies Used: ColdFusion, Java, Angular, RxJs, Bootstrap, SASS, Rest API

Project 2: Buckland (NBEMS) / Product
Duration: Around 1 Year
- The goal of this project is to ensure that the NB Land Exports Mx Operations in the Southern Border are properly managed throughout the whole operation's lifecycle including the operation management, proper and timely billing, and customer reporting.
- This application shall collect manage, track and automate as much as possible NB land operations occurring in the US southern borders.

Technologies Used: Coldfusion, Angular version 14, RxJs, Bootstrap, SASS, Rest API

Project 3: EESPC/ Product
Duration: Around 3 months
- EESPC is the project based on the compliance tracking software.
- And it was built using Angular 13 and spring boot framework.

Technologies Used: Angular version 13,RxJs ,Bootstrap ,SASS ,Rest API

Roles & Responsibilities :

- Implementation of various modules in the project, worked in margin requirements, pricing and customer interests screen mainly.
- Sole responsible for all the ledger and balance calculations in the project.
- Sole responsible for fixing the bugs faced after the release of the project. Developed the front-end pages based on the EDUCATION design made by the UX team and developed the dynamic and responsive UI.
- Having experience using different design systems such as Material, Bootstrap and SCSS. Experience developing web applications with modern JavaScript programming frameworks, tooling and libraries and building responsive page applications with a modern application framework such as Angular.
- Implementation of various modules in the project. Api integration and functionality. Sole responsible for fixing the bugs faced after the release of the project.
- Worked with multiple teams to create HTML elements/frameworks for use by development teams.
- Designed web pages and applications with minimal time that met business and user goals. Identified and troubleshooted UI problems like responsiveness and approached the highly logical and analytical
- solution and experience in web-based UI code.
- Implementation of various modules and reusable components in the project. And shared my ideas and creativity in the project discussion.
